

# Amazon FBA Packaging Compliance Checklist

## 1. Box selection

Box is rigid, six-sided, and new (or reused with all old labels removed)

Box does not exceed 25" per side unless oversized

Box weight is  $\leq$  50 lbs (or clearly marked as heavy)

Box flaps are intact and securely taped shut

## 2. Product packaging type

Loose units properly bagged, wrapped, or boxed

Sold-as-set items bundled securely

Bubble-wrapped items sealed with no exposed edges

Liquids double-sealed (e.g., shrink wrap + tape)

Sharp items have protective sheaths

## 3. Prep and protection

Void fill is used (no movement when shaken)

Fragile items marked and packed accordingly

Meltable items meet temperature and seasonal rules

Expirable products meet shelf-life guidelines

## 4. Labeling

Correct barcode applied (FNSKU or Manufacturer)

Label printed at  $\geq$  300 DPI and is scannable

Labels placed on flat surface—not on corners or seams

All other barcodes covered or removed

## 5. Box/pallet labeling

Carrier + FBA Box ID label on every box

Pallets labeled on all four sides, top center

All labels match shipping plan exactly
